

HEALTH CARE FOR ALL
THE IMMIGRANT HEALTH CARE ACCESS PROJECT
Know your health care rights!

EVERYONE in MA can access some health services regardless of immigration status

It is safe to see a doctor in a health clinic or go to the hospital, including if you have a medical emergency

You can access quality and affordable medical services at a Community Health Center in your local community and they may have staff who speak your language

Your doctor, health center, and hospital cannot give your personal information, including information about your immigration status, to the government unless you agree to share that information

If you cannot afford your medical bills, there may be help available to you

It is safe to apply for MassHealth, the Health Connector or Health Safety Net. Those programs do not share personal information, including your immigration status, with immigration enforcement authorities (ICE).

*This project is possible thanks to commitments and funding from Jane's Trust, the Miller Foundation and the MetroWest Health Foundation.
